Mental Health and Learning Disability nursing students' perceptions of the usefulness of the Objective Structured Clinical Examination to assess their competence in medicine administration. International Journal of Mental Health Nursing 23 4 364 373 2013.

OSCE principal features a circuit of 10 12 15 stations short usual is 510 minutes each candidate is examined on a one to one basis station is real or simulated patients actors or alternatively real or simulated clinical problem each station has a different examiner students rotate through the stations completing all the stations on their circuit, the objective structured clinical examination OSCE first used in the 1970s is an assessment of competence carried out in a well-planned structured and objective way. Harden and Gleeson 1979 it is well established within medicine and is used increasingly in nurse education Nulty et al 2011.

The test format is the objective structured clinical examination OSCE. The test consist of 11 physically separated examination stations see picture below each manned with its own 1 2 examiners who passes a score which is independent of performance in the other tasks on the other stations, however in OSCEs that use several circuits of the same stations the marking is repeatedly shown to be very consistent which supports the validity that the OSCE is a fair clinical examination there are arguments for and against quarantining OSCE examinees to prevent sharing of exam information, the OSCE is a structured performance test that uses 15 or 16 client interactive examination stations depicting various clinical scenarios. These scenarios use standardized patients played by actors to provide real life interactions with the examination candidate. Some client interactive scenarios are complemented by written questions, applying for part 2 the OSCE part 2 is a nursing or midwifery objective structured clinical examination OSCE. The OSCE can only be sat after successfully passing part 1 and only the NMC can authorise a candidate to take part 2 after successfully passing the assessment stage, the objective structured clinical examination OSCE is one such method it has the advantage that it allows a large number of competencies to be assessed in conditions which are the same for all.

The objective structured clinical examination OSCE has been used to assess medical students since the mid 1970s and in more recent years has been increasingly utilised to assess students from nursing and the allied health professions, the objective structured clinical examination is a versatile multipurpose evaluative tool that can be utilized to assess health care professionals in a clinical setting it assesses competency based on objective testing through direct observation it is precise objective and reproducible allowing, about OSCE the objective structured clinical examination OSCE is an assessment method based on a student's performance that measure their clinical competence with the use of standardized patients. SP students are introduced to different medical scenarios through a series of patient stations, OSCE online has web and iPad apps for conducting online paperless objective structured clinical examinations OSCE online can be used across any OSCE assessment format like USMLE MRCOG PLAB ECFMG iPad app Android app exam creation apps online OSCE, the objective structured clinical examination OSCE originally developed in the 1970s has been hailed as the gold standard of clinical assessments for medical students and is used within medical schools throughout the world in terms of Miller's Triangle describing a framework for clinical assessment. OSCEs aim to examine skills and ability at the shows how level with an, objective structured clinical examination OSCE the OSCE is a one day station type examination administered the day after the written examination it is designed to test aspects of clinical judgement OSCE stations generally have two questions and require the examinee to review the information.
supplied e.g. patient history, typically OSCE stations will vary in length and may consist of multiple phases. Each school and department will have specific procedures in place regarding the running of their OSCEs. These guidelines are designed to ensure examination conduct is upheld throughout the OSCE process. The objective structured clinical examination (OSCE) is a station-type examination held in a morning and afternoon session. You will have five minutes to answer the questions at each station. There are two types of questions in the OSCE: most stations have two questions and require the candidate to review the information supplied e.g. case.

The clinical examination component of the registration process for nurse practitioners in British Columbia is an objective structured clinical examination (OSCE). The purpose of the OSCE is to assess the capacity of the nurse practitioner candidate to provide health care services to the patient from a holistic nursing perspective. OSCE is an acronym for objective structured clinical exam. It describes a form of performance-based testing used to measure a student's clinical competence during an OSCE. Trainees are observed and evaluated as they go through a series of stations in which they interview, examine, and treat. Objective structured clinical examination (OSCE) standardised conduct of OSCE examiners is fairness to one candidate and fairness to all candidates. Preparation for the station as an examiner is your responsibility for the running of your station. Everything should have been completed.

Objective structured clinical examination (OSCE) was introduced by Harden and Gleeson in 1975 as a procedure to assess clinical competence at the bedside using timed stations. Since its introduction as a mode of students' assessment, the OSCE has become a standard method of assessment in both undergraduate and postgraduate students. The Medical Council of Canada is pleased to launch the objective structured clinical examination (OSCE) Orientation Program. This program is designed to help candidates prepare for the OSCEs, including the National Assessment Collaboration (NAC) examination and the Medical Council of Canada Qualifying Examination (MCCQE) Part II.

Common mistakes made on objective structured clinical examination (OSCE) stations are outlined on the following page. Common mistakes made include scenarios in which candidates are not careful to avoid these situations. Part B: Objective structured clinical examination (OSCE) candidates must have passed Part A of the examination to be eligible to apply for Part B. There is a limit of six occasions on which candidates may attempt to pass Part A of this examination and four attempts in which to pass the Part B. The OSCE is a form of performance-based testing used to measure candidates' clinical competence during an OSCE. Candidates are observed and evaluated as they go through a series of stations in which they interview examine patients.
